OPERATION 10 Repair Primer

Shop: ET

Cntrl Rm Console: na

OPR: ETM Zone: na

Hazard (Y/N): N Duration (Hrs): 2.1

WARNING

Isopropyl Alcohol is flammable and is a skin, eye and respiratory tract irritant that affects the central nervous system. Insure adequate ventilation, avoid inhalation of vapors and do not use near heat, sparks or open flame. Personnel shall wear chemical resistant gloves and chemical splash goggles. When working at eye level or above wear a face shield over goggles.

W\$002.a 02402401

NOTE

Operations involving Crit 1/1R/1S items are contained in the following steps.

ET Spherical Bearing (EB-4) Inspection

Remove P78-3102-4-102 protective cover from EB-4 (RH) bearing.

Wipe spherical bearing surfaces clean using Rymple cloth and IPA.

Place protective cover on clean, padded surface and protect-from debris / contamination for reinstallation.

T: 10-3-02

Obtain mold impression of PD 1 defect on EB-4 spherical bearing per RT OMI T5045.082

r: <u>"</u> 10-3-07

9/23/02 04:15:33 PM

10-3 Verify Ref: 36L12-1 (LI) EB-4 Spherical bearing and race surfaces are free of nicks and gouges as outlined in Criteria Table below. Ref. Figure 10-1.

Verify PD 1 defects (scratches in bore) in Region II are acceptable per Criteria and mold impression results.

Verify bearings and race free of grease, foreign material and raised metal.

Region	EB Spherical Bearing Inspection Criteria (Ref OMRS S00HB0.160)	
1	Spherical surfaces and race - no defects greater than 0.010 in. deep and proximity to defects no less than 0.20 in.	
п	Bearing bore - no defects greater than 0.006 in. deep and proximity to other defects no less than 0.20 in.	
Ш	Area between ball and within 0.040 in. of outer edge - no defects greater than 0.02 in. and proximity to other defects no less than 0.20 in.	
IV	Outer and inner edges (corners) - no defects greater than 0.040 in. deep.	

9/23/02 04:15:33 PM PR ET-093-ST-0012

Oppor glador

CSR-242

Install P78-3102 protective cover on EB-4 bearing as follows:

- 1. Insert -4-6 capscrew, with -4-7 and -4-8 flat washers, and -4-104 assembly in consecutive order through 36L12-4 bearing.
- 2. Install in consecutive order, -4-26 spacer, -4-104 assembly, -4-8 and -4-7 flat washers and -4-2 stop nut on -4-6 cap screw.

Torque stop nut (1) TORQUE TO 200 to 220 in. lb

Cal No. 125640 T: 10-4-02

*** End of Operation 10 ***

OPERATION 20 PR Summarization and Closure

Shop: ET

Cntrl Rm Console: NA

OPR: ETM Zone: na

Hazard (Y/N): N Duration (Hrs): 1.69

Concluding Summary

Ref PD 1. The EB-4 (RH SRB Upper strut connection) spherical bearing was detected with vertical scratches during the Post ET Demate inspection. Mold impressions were taken of the 3 suspect bearing defects for dimension measurement. The impressions were analyzed QA and all three areas had "no measurable depth" which is quantitatively equivalent to a depth of less than 0.001 inch.

Therefore, EB-4 spherical bearing is acceptable per OMRS S00HB0.160 and Ref: 80901019010 (LI) ET Acceptance Manual . No RC action required.

Cause PD 1: Unavoidable damage from ET Demate from SRBs.

20-1 Close this PR.
